

Transmission of Distant Pranic Healing Effects Through a Technological Interface

Joie Jones, PhD.
Professor of Radiological Sciences
University of CA, Irvine

Yury Kronn, PhD.
Vital Force Technology™
Energy Tools International, LLC

Introduction

Today we are presenting experimental results that, in our opinion, demonstrate some fundamental properties of “Subtle Energy”, called the “Life Force” by many Ancient Traditions.

As you will see, the results of our experiments answer, to some extent, such fundamental questions about the Subtle Energy Field (SEF) as:

1. Does the name “Life Force” reflect the crucial role the SEF plays in the organization and functioning of living organisms?
2. Are our minds really connected to the realm of the SEF? In other words, are our minds capable of programming specific actions of the SEF that can dramatically affect living organisms? We can also say that this experiment sheds some light on the energetic mechanism of “the power of intent”.
3. Is Subtle Energy (Life Force / Chi / Prana) associated only with living organisms or is it one of the energy fields of the Universe and hence, can be technologically accessed and programmed?

Experimental Results

As reported earlier [1], the long term research (over a period of 10 years) conducted by Prof. Joie Jones on the effect of Pranic healing on human cells, in culture, demonstrated the ability of Pranic healers to increase the survival rate of HeLa cells subjected to gamma radiation from the expected 50% for the untreated cells, to over 90% for cells treated both before and after radiation. Obviously further research into the governing laws and properties of the energy involved in this healing process is vitally important to understanding the mysteries of these phenomena.

To pursue this goal three Subtle Energy (Prana, Chi) patterns were produced and then recorded with the Vital Force Technology™ equipment (see Appendix).

- a) A Pranic healer, on a phone connection, directed energy from a distance of more than 800 miles to Dr. Kronn’s laboratory. The recipient in the lab was holding a glass of liquid concentrated trace minerals for 5 minutes, in a relaxed and thought free state.
- b) A Pranic healer from the Moscow area focused energy directly to another glass of the same minerals while seeing the glass via a Skype connection.
- c) An energy pattern was generated by the Vital Force Technology™ generator on the basis of the electronically simulated element Erbium, known for its influence on cellular health.

In all three cases the energy patterns were infused into a Ringer solution and the solution was added to petri dishes with HeLa cells that grow in that solution. The same amount of “uncharged” Ringer solution was added to the control samples with radiated and non-radiated cells. As in the Pranic

healing experiments, the maximum increase in the survival rate of cells occurred when the energy infused solution was added before and after the radiation of the cells.

The difference in survival rate induced by the three energy patterns was not significant (less than 8%) and for this reason we are presenting the results averaged with all three patterns together.

Forty-five experiments in petri dishes (15 for each energy pattern) were conducted in three different laboratories:

1. The “conditioned lab”: a lab that has been energetically cleaned by Pranic healers over a period of 10 years of experimental work.
2. The “non-conditioned lab”: a fairly new and well maintained environment.
3. The “dirty lab”: where experiments on dissected animals and other similar experiments have been conducted over a long period of time.

The results of our experiments are presented in the following table:

TABLE 1: "S" Represents all three energy patterns

	Non Infused Solution		Infused Solution		
	A Control Untreated	B Control Radiation Treated	C Added After Radiation	D Added Before Radiation	E Added Before and After Radiation
Conditioned Lab					
S, ave all (45)	99.6%	50.5%	68.2%	77.7%	83.0%
S, ave suc (40)	99.5%	50.5%	71.1%	82.0%	88.2%
S, ave fail (5)	99.4%	50.8%	51.0%	50.8%	50.6%
Non-Conditioned Lab					
S, ave all (45)	99.5%	50.6%	53.6%	54.1%	56.2%
S, ave suc (5)	99.2%	50.6%	71.5%	82.1%	88.3%
S, ave fail (40)	99.4%	50.4%	51.1%	50.8%	50.5%
"Dirty" Lab					
S, ave all (45)	99.6%	50.4%	51.0%	50.7%	51.2%
S, ave suc (0)	NA	NA	NA	NA	NA
S, ave fail (45)	99.6%	50.4%	51.0%	50.7%	51.2%

From Table 1 we can see that the average percentage of increase in the survival rate in successful experiments is practically the same in the “conditioned” and “non-conditioned” labs: 88.2% and 88.3% but the number of failed experiments is dramatically different, while in the “dirty” lab there are no successful experiments at all. The same situation was observed in experiments with Pranic healers.

TABLE 2: Percentage of Successful experiments with S energy patterns

	Pranic Healing	S Patterns
Conditioned Lab	88%	89%
Non-Conditioned Lab	10%	11%
“Dirty” Lab	0%	0%

Obviously, the energetically polluted environment jams the “energetic programs” capable of dramatically increasing the survival rate of cells subjected to gamma radiation in a cleaner energetic environment.

The above results stimulated us to conduct additional experiments aimed at finding ways to protect the healing action of energy patterns infused into Ringer solutions from being destroyed by energetic pollution. At the suggestion of the Pranic healer who previously transmitted the energy patterns used in the experiment discussed above, a new “Protective” energy pattern (“P”) was chosen using the “Cosmoenergetic System”. This pattern was transmitted from the Moscow region to Dr. Kronn’s laboratory and recorded by Vital Force Technology™ using the previously described method. The next 45 experiments were conducted in each of the same three labs. This time the Ringer solution added to the experimental samples was infused with the P-pattern along with each of the previous Subtle Energy patterns.

The experimental results are presented below:

TABLE 3: "SP" Represents all three energy patterns plus a protection energy pattern

	Non Infused Solution		Infused Solution				
	A Control Untreated	B Control Radiation Treated	C Added After Radiation	D Added Before Radiation	E Added Before and After Radiation		
Conditioned Lab							
SP, ave all (45)	99.7%	50.3%	68.5%	77.4%	82.9%		
SP, ave suc (40)	99.3%	50.4%	71.6%	82.2%	88.0%		
SP, ave fail (5)	99.5%	50.7%	51.2%	50.4%	50.7%		
Non-Conditioned Lab							
SP, ave all (45)	99.4%	50.1%	68.5%	79.1%	82.4%		
SP, ave suc (36)	99.5%	49.8%	71.8%	82.5%	88.1%		
SP, ave fail (9)	99.3%	50.3%	51.4%	50.4%	50.8%		
"Dirty" Lab							
SP, ave all (45)	99.2%	50.3%	61.6%	66.8%	70.3%		
SP, ave suc (23)	99.1%	50.5%	71.7%	82.6%	88.2%		
SP, ave fail (22)	99.3%	50.1%	51.2%	50.6%	51.0%		

In these results we can see dramatic changes in the number of successful experiments in both the “non-conditioned” and “dirty” labs.

TABLE 4: Percentage of Successful Experiments

	Pranic Healing	S Energy Pattern	S & P Energy Pattern
Conditioned Lab	88%	89%	89%
Non-Conditioned Lab	10%	11%	80%
“Dirty” Lab	0%	0%	51%

From Tables 3 and 4 we can see:

- a) Adding the protective energy patterns made the average increase in the cell survival rate in successful experiments the same in all three labs and made the average overall increase in survival rates in the “dirty” lab statistically significant.
- b) Adding this protective pattern did not change the number of successful experiments in the “conditioned” lab, which it is logical to expect, while significantly affecting the results observed in the two labs with energetically polluted environments.

Conclusion and Discussion

1. Subtle Energy patterns demonstrated the ability in successful experiments to revive more than 75% of cells destroyed by gamma radiation, acting truly as a “Life Force”. We would like to make note that the observed increase in the healing effect of the Subtle Energy in the “dirty” environment when using the “protective” energy pattern suggests that this protection method might find a practical application in the field of Energy Medicine. The reason for the existence of about 10% of failed experiments even in the “conditioned” lab still needs to be explained. This is one of our goals in future experiments.
2. Subtle Energy (Prana, Chi) can be programmed for specific healing purposes by the trained human mind as well as by properly programmed Vital Force Technology™ equipment. The precision of action of the two different types of Subtle Energy patterns (S1, S2, and S3 for healing purposes, and P for protection against energetic pollution) is amazing.
3. What is usually called the “intent” of the human mind can be technologically captured and reproduced.
4. The fact that, in all four cases (S1, S2, S3, P), Subtle Energy encoded information was successfully recorded, stored and reproduced technologically, indicating that Subtle Energy is not just a “biofield” but an energy field belonging to the Universe just like the electromagnetic field.
5. The ability of liquid minerals (concentrated sea salt) to hold and transfer to the Vital Force Technology™ equipment the healing information encoded in Subtle Energy, demonstrates the presence of the intricate and fundamental interaction between the Subtle Energy field and physical matter.
